# Amir Butt

Technical Delivery Lead | Software Architecture | ML Consultant  
London Area, United Kingdom

## Summary

I have years of IT experience across various skills ranging from Enterprise Architecture and transformation to technical project management. Providing solution ownership, IT strategy, implementation lead, infrastructure architecture, enterprise architecture, and technical consulting. Collaborating across all domains to shape strategy, project incubation, and delivery to realise customer outcomes. Managing delivery teams and deliverables to tight deadlines and high quality.

Demonstrated expertise in Cloud, Application, Data, and Security domains, with a focus on delivering solutions tailored to the unique requirements of the Finance and Banking industries.

Outstanding communication, negotiation, and interpersonal skills with a reputation for forming productive business relationships. A natural leader who builds cohesive teams and fosters collaborative efforts, providing the motivation and direction to drive excellence. Flexible team player who thrives in an environment requiring the ability to effectively prioritise and juggle multiple concurrent projects.

Specialties: - Strategy Development

- Enterprise Architecture
- Corporate Planning
- Change Management
- Project & Programme management
- Systems Integration
- Architecture frameworks and roadmaps
- Information Assurance & Security
- Team management

## Experience

Soho House & Co  
Technical Delivery Manager  
July 2021 - Present (4 years 7 months)  
London, England, United Kingdom

Worked with the business in strategic design process and translate business needs into technical system solutions, prepare technical documentation for developers and assisting with development of test plans.

- Managed off-shore resources and 6-8 contract resources working at different vendor locations.
- Researched, architecture, designed, wrote and tests new software programs.
- Successfully delivered products meeting all goals for schedule, quality within a very aggressive delivery timeline.
- Responsible for all development, testing, and implementation involving vendors and business partners.
- Enhanced existing systems by analysing and identifying areas for improvement/modification.

Contiki Marketing Lab c/o BS&T  
Technical Development Manager  
December 2017 - July 2021 (3 years 8 months)  
London, United Kingdom

- Utilised enterprise architecture principles, particularly TOGAF, to baseline model and maintain data and technical maps for 50+ products and associated services, providing invaluable insights to aid strategic business decisions and support projects. Additionally, played a key role in defining and implementing the product vision, guiding and collaborating with product managers to develop effective roadmaps.
- As part of the enterprise architecture team, I provided architectural frameworks to sprint teams, enabling a comprehensive understanding of data, processes, and infrastructure within the organisation. This encompassed identifying critical constraints and considerations, and I held the responsibility of design authority sign-offs during sprints to ensure alignment with architectural guidelines.
- Moreover, my involvement extended to providing user stories and acceptance criteria, assuring the delivery of business value and the successful implementation of solutions within iterations/sprints. My comprehensive understanding of enterprise architecture allowed me to effectively manage the product feature backlog and prioritise releases into product development cycles, actively driving the strategic direction as a Project Sponsor in various projects.

**CitiAmex Technologies**

Technical Architect

October 2015 - December 2017 (2 years 3 months)

London

Working as a consultant at CitiAmex technologies, I worked on a variety of projects as Business Analyst, Architect and Project Manager/Scrum Master.

- I evaluated and made recommendations to client on a mobile work management solution to support their existing and future business requirements
- I managed the agile development of an in-house mobile app, leading it through a succession of sprints to bring down a significant product backlog and defining a clear product roadmap.

**GenieSoft Services**

10 years 7 months

Solutions Architect

October 2008 - November 2015 (7 years 2 months)

London, England, United Kingdom

As the Solution Architect at GenieSoft Services, I led projects and workstreams designing architectures to implement business transformation and digital services for clients across multiple industries.

- Owning the technical aspects of Geni larger more complex projects, from requirements gathering through delivery and to proving business value.
- Creation and ownership of reference architecture for the delivery teams.
- Creation of high level and detailed design documents
- Providing thought leadership and expertise where required, reviewing document and giving feedback.
- Creating pre-sales and contractual documentation; statements of work, proposals, etc.

**Technical Project Manager**

May 2005 - September 2008 (3 years 5 months)

London

- Responsible for planning, tracking and coordinating the day-to-day activities of the web development teams including mentoring of junior developers as well as overseeing day-to-day project's progress.
- Managed cross-functional offshore teams, consisted of business analysts and network specialists.

- Coached the web development teams on different Global Distribution Systems (GDS), e.g. Worldspan, Galileo, Amadeus and Sabre.
- Managed all stakeholder communication and reported on current project status and raised risks and issues where applicable.
- Managed projects to specific timelines and within budget, and solved obstacles throughout the project life cycle.

#### Major achievements

- Develop, deliver and manage e-commerce websites, mobile app and CMS solutions for external clients
- Successful implementation of company back-office, leading to an annual cost reduction of 25K

Iglu.com

Lead Developer

January 2003 - March 2005 (2 years 3 months)

London, United Kingdom

---

## Education

University of Essex

Master's Degree, Software Engineering · (1999 - 2000)

NED University of Engineering and Technology

Bachelor of Engineering (B.E.), Computer Technology/Computer Systems Technology · (1993 - 1997)
